PROFESSIONAL SUMMARY

Computer Science student and aspiring software developer with hands-on experience building web applications, desktop software, database systems, developer tools, and AI-powered solutions. Comfortable working across frontend development, backend concepts, databases, APIs, automation, and software deployment.

I have a strong interest in creating practical software that solves real-world problems, with experience working on projects involving **HTML, CSS, JavaScript, React, Python, SQL, Git/GitHub, APIs, databases, and AI integration**. I am continuously expanding my skills in software engineering, cybersecurity, cloud technologies, artificial intelligence, and application development.

TECHNICAL SKILLS

Programming & Web Development

HTML, CSS, JavaScript, React, Vite, Python, Java, C#

Databases

SQL, Microsoft SQL Server, Microsoft Access, PostgreSQL, MongoDB, database design, relationships, queries, joins, stored procedures, triggers

Software & Application Development

Desktop applications, web applications, mobile application concepts, REST APIs, automation, GUI development

AI & Emerging Technologies

AI integration, AI-assisted development, machine learning fundamentals, AI-powered application concepts

Development Tools

Git, GitHub, GitHub Actions, VS Code, Docker, FFmpeg, Linux/Ubuntu, Windows

Other Areas of Interest

Cybersecurity, cloud infrastructure, game development, Unity, Blender, networking, operating systems, software engineering

PROJECTS

School Portal System

Full-Stack / Database Development

Designed and developed concepts for a comprehensive school/college management portal intended to centralize student and administrative services.

Key functionality included:

- Student profile and academic information management
- CAT and examination results
- Assignment/submission management
- Fee and payment management
- Hostel booking
- Exam calendars and registration
- Notifications and student communication
- Database architecture and relational data design

Focused on designing the system around real institutional workflows while considering scalability, usability, and data organization.

MediaGrab

Python | CustomTkinter | FFmpeg | GitHub Actions

Developed a desktop media-downloading application designed for Windows, Linux, and macOS.

Implemented and explored features including:

- Modern graphical user interface
- Playlist selection
- Download history

- Pause, resume, cancel, retry, and delete functionality
 - FFmpeg detection and automatic handling
 - Cross-platform packaging considerations
 - Automated release and CI/CD workflows using GitHub Actions
-

Anime Streaming Platform

HTML | CSS | JavaScript | APIs | Web Development

Developed and refined a streaming-platform concept inspired by modern services such as Netflix.

Worked on:

- Cinematic hero sections and content sliders
- Trending and completed-anime sections
- Search functionality
- Pagination
- Episode organization
- Streaming-provider integrations
- API-based content retrieval
- Responsive UI/UX design

The project involved troubleshooting real-world API/provider limitations and improving the overall user experience.

Email Verification Tool

Python | Web Development | Data Processing

Worked on an email verification application capable of processing files such as:

- CSV
- XLSX
- TXT

The application was designed to support batch verification, results processing, exporting, and user-friendly file handling.

Complex Developers

Web Development | Software Development

Worked on the concept and development of a software-development brand and landing page offering services including:

- Web design and development
 - Software development
 - Game development
 - AI integration
 - API integration
 - Cybersecurity
 - Cloud infrastructure
 - Automation
 - App development
 - Maintenance and SEO
-

EDUCATION

Bachelor of Science in Computer Science

Moi University, Kenya

Currently pursuing a degree in Computer Science.

Relevant areas of study and practical learning include:

- Programming
- Database systems
- Computer networks
- Operating systems
- Software development

- Web technologies
 - Computer architecture
 - Systems analysis and design
-

CERTIFICATIONS

- Certificate in Operating Systems
 - Certificate in Computer Networking
 - Certificate in Graphics Design
 - Certificate in Computer/Office Applications
-

ADDITIONAL TECHNICAL EXPERIENCE

- Linux/Ubuntu environment administration and troubleshooting
 - Database development using SQL Server and Microsoft Access
 - Git and GitHub-based project management
 - GitHub Actions and CI/CD workflows
 - Debugging application and environment configuration issues
 - API integration and troubleshooting
 - Software packaging and cross-platform application considerations
 - Working with AI coding and development tools
 - Basic cybersecurity and ethical hacking exploration
-

PROFESSIONAL INTERESTS

Software Engineering · Artificial Intelligence · Cybersecurity · Full-Stack Development · Cloud Computing · Automation · Game Development · Database Systems · Developer Tools

GITHUB

GitHub: <https://github.com/Isaac-Onyango-Dev>

My GitHub portfolio contains software-development projects, experiments, and practical implementations demonstrating my experience with programming, application development, databases, automation, and modern developer tooling.
