PROFESSIONAL SUMMARY

I'm a computer science student and aspiring software developer with hands-on experience building web applications, desktop software, database systems, and AI-powered solutions. Comfortable working across frontend & backend development, APIs, automation and software development.

I have a strong interest in creating practical software that solves real-world problems, with experience working on projects involving HTML, CSS, JavaScript, React, Python, SQL, Git/GitHub, APIs, databases and AI integration.

I am continuously expanding my skills in software engineering, cybersecurity, cloud technologies, artificial intelligence and application development.

TECHNICAL SKILLS

Programming and Web Development
Databases
Software and Application Development
AI and Emerging Technologies
Development Tools

OTHER AREAS OF INTEREST

Cybersecurity, cloud infrastructure, game development, Unreal Engine, Blender, Networking, Operating Systems and Software Engineering.

PROJECTS

School Portal System

Designed and developed concepts for a comprehensive school/college management portal intended to centralize student and administrative services.

MediaGrab

Designed and vibe coded a desktop media-downloading application designed for windows, and Linux using Python, CustomTkinter and FFmpeg.

Complex Developers

Worked on the concept and development of a software-development brand and landing page offering services.

EDUCATION

Diploma in Computer Science – Moi University TVET Institute, Kenya

Relent areas of study and practical learning include:

1. Programming
2. Database Systems
3. Computer Networks
4. Operating Systems
5. Computer Architecture
6. Web Design
7. Graphics Design

Etc.

CERTIFICATIONS

- Certificate in Operating Systems
- Certificate in Computer Networking
- Certificate in Graphics Design
- Certificate in Computer Organization and Architecture
- Certificate in Database Management
- Certificate in Web Development

Etc.

ADDITIONAL TECHNICAL EXPERIENCE

- Linux/Ubuntu environment administration
- Git and GitHub-based project management
- Basic Cybersecurity and ethical hacking
- Game development with Unity
- Blender

Etc.

PROFESSIONAL INTERESTS

1. Software Engineering
2. Artificial Intelligence
3. Cybersecurity
4. Full-Stack Development
5. Cloud Computing
6. Game Development
7. Database Systems
8. Developer Tools
